Subject: Dominion - EPA CWA 308 Request

Doug, thank you for speaking with us last Thursday to go over the CWA 308 information request. Based on our discussion, we plan to prioritize and expedite the production of responsive information related to items 27, 28, 29 and 30 by or before the February 13 deadline.

Ex. 7(a)

Ex. 7(a) Also, with respect to the other requested information, we will strive to produce all that we can by the February 13 deadline, but we respectfully request up to an additional 30 days – to March 15 – to complete our production of responsive information. Please let us know if that will be acceptable to EPA. With respect to certain of the numbered requests for which we discussed clarifications and/or narrowing, we will be sure to specify those clarifications or scoping adjustments in our responses so that you have a chance to ask follow-up questions after your review, if needed. This will include narrowing #19 and the other requests related to “Power Plants” to coal-fired electric generating facilities (past or present) that have associated, on-site coal ash storage.
